
Observable time traces (100-step resolution)
HB: bond count from hb_obs.dat | Dist: min(6 pair distances) from dist_obs.dat
RT thresholds — HB: hb ≤ 0.0 / hb ≥ 6.0 | Dist: mindist ≤ 2.0 / mindist ≥ 14.0
Colour = seed identity (tab10). Faded = outlier/FAIL. Legend shows round-trip count per seed.
